The 'ATmega AVR JTAG' License Upgrade for the FS2009 Programmer supports high-speed In-System Programming (ISP) of Atmel ATmega AVR Microcontrollers via their on-chip JTAG port. The JTAG algorithm yields much faster programming times (3 - 4 times faster) than the traditional SPI algorithm due to an enhanced protocol and higher bus speed. It is also possible to program multiple AVR microcontrollers which are part of a **JTAG Chain** on the same Target System using the JTAG algorithm.

The JTAG port can be used for firmware development (repetitive programming and debugging) by connecting an Atmel JTAG ICE MK2 debugger. The same JTAG port can then be used for production ISP programming using an Equinox high-speed JTAG ISP programmer.

*Supports In System Programming (ISP) via the JTAG port of the target microcontroller.*

**Features**

## ► Main Features

- Supports high-speed JTAG programming of a single Atmel AVR microcontroller connected via the JTAG interface
- Supports high-speed JTAG programming of multiple Atmel AVR microcontrollers which are connected as part of a 'JTAG Chain' (JTAG daisy-chain mode).
- Fast programming speeds via JTAG (3 - 4 times faster than SPI method)
- Simple 4-wire JTAG Interface to microcontroller
- Same JTAG Interface as Atmel JTAG ICE MK2 Debugger
- User-selectable JTAG frequency
- Supports JTAG Chain Validation
- Supports checking of the 'JTAG ID' of both AVR and any generic JTAG devices eg. CPLD's
- Supports automatic checking of 'Silicon Revision' of target JTAG device

## ► Advantages of JTAG Programming

- The JTAG algorithm is approximately 3-4 times faster at programming compared to the SPI algorithm.
- The programming time using JTAG for the EEPROM is significantly faster than the SPI algorithm
- The JTAG algorithm uses the same 'JTAG Port' as the Atmel JTAG-ICE Debugger.
- In JTAG mode it is possible to change the 'Clock Selection Fuses' to any value and still program the chip. (with the exception of the 'JTAGEN' Fuse)
- It is possible to daisy-chain multiple JTAG devices on the JTAG bus in a so-called 'JTAG Chain' and then select to program a particular device in the chain. This functionality is now supported by Equinox programmers running firmware 3.07 and above.

## ► JTAG connections (Single JTAG Device)

**Product Information**

**Product:** FS2009 - JTAG ISP Upgrade for Atmel ATmega AVR Microcontrollers

**Manufacturer:** [Equinox Technologies](#)

**Order Code:**

**Equinox:** FS2009-UPG7

**Digi-Key:** FS2009-UPG7-ND

**Availability:** 999 in stock

**Price:** 149.95 (GBP)  
[Excl. VAT]

**Overview Product**

**JTAG In-System Programming (ISP) Support for Atmel ATmega AVR Microcontrollers >>**

**01 July 2007:**

Digi-Key now distribute Equinox products in Europe & Asia along with North America, South America and Canada. >>

- Supports high-speed JTAG programming of a single Atmel AVR microcontroller
- Uses only 4 x JTAG pins + control of the AVR RESET pin
- Uses the same JTAG port pins as used by the Atmel JTAG ICE debugger

#### ► JTAG Chain Programming Support

- Supports programming of Atmel AVR microcontrollers which are part of a 'JTAG Chain'
- An individual 'Programming Project' is used to program a specific 'JTAG Device' in the 'JTAG Chain'
- The algorithm supports 'JTAG Chain' programming of both legacy AVR devices eg. ATmega16 and newer AVR devices eg. ATmega2560 with the devices placed in any order in the JTAG Chain
- High-speed 'JTAG Chain' programming possible due to optimised algorithms
- Supports JTAG Chain validation (checks the integrity of the JTAG Chain)
- Supports checking of the 'JTAG ID' of any other non-AVR JTAG device eg. CPLD in the chain

##### Software Tools

**JTAG In-System Programming (ISP) Support for Atmel ATmega AVR Microcontrollers >>**

##### Upgrades

**JTAG In-System Programming (ISP) Support for Atmel ATmega AVR Microcontrollers >>**

- Equinox programmers feature the same 10-way IDC connector as the Atmel JTAG ICE debugger
- The same JTAG interface can therefore be used for both debugging during the "development phase" and "In-System Programming" during the "production phase"

### Device Support (by family)

This product supports devices from the families listed below:

#### Atmel Corporation:

- AT90CAN - AVR with on-chip CAN : AVR microcontroller with on-chip CAN
- AT90USB - AVR FLASH Microcontroller Family
- ATmega AVR - FLASH Microcontroller Family
- ATmegaxxxP 'PICO Power' AVR Microcontroller Family

#### Please note:

Not all devices may be supported within a family.

Please see the [Detailed Device Support List](#) for a list of all devices which the product supports.

### Ordering Information...

#### FS2009 - JTAG ISP Upgrade for Atmel ATmega AVR Microcontrollers

License Upgrade for the FS2009 Programmer to support fast In-System Programming (ISP) of the Atmel ATmega AVR Microcontroller Family using the JTAG algorithm.

## О компании

ООО "ТрейдЭлектроникс" - это оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов. Реализуемая нашей компанией продукция насчитывает более полумиллиона наименований.

Благодаря этому наша компания предлагает к поставке практически не ограниченный ассортимент компонентов как оптовыми, мелкооптовыми партиями, так и в розницу.

Наличие собственной эффективной системы логистики обеспечивает надежную поставку продукции по конкурентным ценам в точно указанные сроки.

Срок поставки со стоков в **Европе и Америке – от 3 до 14 дней.**

Срок поставки из **Азии – от 10 дней.**

Благодаря развитой сети поставщиков, помогаем в поиске и приобретении экзотичных или снятых с производства компонентов.

Предоставляем спец цены на элементы для создания инженерных сэмплов.

**Упорный труд, качественный результат дают нам право быть уверенными в себе и надежными для наших клиентов.**

### Наша компания это:

- Гарантия качества поставляемой продукции
- Широкий ассортимент
- Минимальные сроки поставок
- Техническая поддержка
- Подбор комплектации
- Индивидуальный подход
- Гибкое ценообразование

Наша организация особенно сильна в поставках модулей, микросхем, пассивных компонентов, ксайленсах (XC), EPF, EPM и силовой электроники.

Большой выбор предлагаемой продукции, различные виды оплаты и доставки, позволят Вам сэкономить время и получить максимум выгоды от сотрудничества с нами!

## Перечень производителей, продукцию которых мы поставляем на российский рынок

Trade Electronics.ru

гарантия бесперебойности производства и  
качества выпускаемой продукции

С удовольствием будем прорабатывать для Вас поставки **всех** необходимых компонентов по текущим запросам для скорейшего выявления групп элементов, по которым сотрудничество именно с нашей компанией будет для Вас максимально выгодным!

С уважением,

Менеджер отдела продаж ООО

«Трейд Электроникс»

Шишлаков Евгений
